

Identify Learning Objectives and Desired Outcomes

Learning objectives and outcome are critical for planning and evaluating the ASADS conference. Learning objectives should be developed after the educational needs for the course have been identified. When developing learning objectives and outcomes please consider using the action verbs list below.

- Learning objectives must be observable and measurable so the participant can assess if the course was useful and beneficial.
- Begin each objective with the statement ***"After attending the course, a participant will be able to."***
